- Also known as „hard gel,“ it can be applied over natural or fake nails.
- **How long it takes preparation:** 45 minutes
- **How it affects nail health:** Again, gel shouldn't damage nails if applied and removed properly by a skilled technician. But you might notice some peeling or weakness in the days following removal. Just be sure to keep nails hydrated with cuticle oil and they'll regain their strength in no time.

- The OG of nail extensions. It's a combination of a liquid and powder that creates a hard protective layer over your natural nail and false tips. The mixture hardens from exposure to air and creates a transparent canvas for regular nail polish.

- **How long it takes preparation:** about 1.5 hours or more for a full set and 45 minutes for a fill

- **How it affects nail health:** If removed properly, you shouldn't expect much damage. Nails may appear a bit weaker due to the fact that they're filed down before application to give the mixture added grip

FRENCH MANICURE

- *Neutral, understated, and goes with absolutely anything.*
- *Truly effortless, though, they are not. French manicures require a steady hand and real precision if they're going to look good.*
- *It's not a quick paint-and-go manicure, but it's very doable with some practice.*

The price of this French manicure is 15 €.

GEL NAIL EXTENSION

- *they are made from the same gel that gel polish is made of, add length to your regular nails like a press-on, and are as strong and long-lasting as acrylics, but without the powder or the harsh chemicals*
- *the price of this extension is 25 €*
- *you do not have to worry about any pain*
